Project Title: Job Trend Analysis – Most Common Tech Titles

Objective: Analyze job listing data to identify the most in-demand job titles in the tech field.

Tools Used: R, ggplot2, dplyr, Posit Cloud

Process Overview:

Cleaned a 100-row dataset containing job listings.

Counted how frequently each job title appeared.

Visualized the top 5 job titles using a bar chart in R.

Key Insights:

Software Engineer, Data Analyst, and Business Analyst are the most posted roles.

This trend supports continued investment in engineering and data-centric roles.
